

**Infratech** Electrical Infrared Inspections are performed while the Electrical system is under load, preventing shutdowns while the procedure is being completed. Inspections will allow maintenance personnel to allocate labour, time and materials for efficient shutdown repairs. High volumes of electrical equipment can be inspected in a short period of time with an extremely high degree of accuracy.

**Benefits**

- Proven loss prevention technique
- Integral to your regular PM program
- No downtime for inspection
- Highly accurate and efficient
- Detailed reporting
- Meets Insurance requirements
- ISO 9001-2015 Certified
- ISO 14001-2015 Certified

**Infratech** General Infrared inspections can be used in for multiple purposes

- Confirm tank/sludge levels in process tanks
- Localize leaks in cladded vessels
- See facility insulation issues
